

NAME

Settlement.pm - Given transaction, determine if it is T+1 or T+2

SYNOPSIS

```
use Settlement::Settlement;

# $row is array of array, read from transaction file

if ( Settlement::Settlement::is_t_plus_1( $row ) ) {
    # this transaction is T+1
}

if ( Settlement::Settlement::is_t_plus_2( $row ) ) {
    # this transaction is T+2
}
```

DESCRIPTION

Logic for whether a transaction is T+1, T+2

Return TRUE or FALSE
