NAME

Reader.pm - Simplified reading and line processing of transactions file

SYNOPSIS

```
use Reader;

# read $transaction_file, execute process_line() on every line
Reader::process_file( $transactions_file, \&process_line );

sub process_line {
    my ( $csv, $row ) = @_;

    # do something with $row
    my $string = join(',', @{$row});
    print $string . "\n";
}
```

DESCRIPTION

Simplify processing of each line of transaction file CSV.

Implement callback function for each line of a CSV, by wrapping Text::CSV.

CSV settings are specific to the transaction file.
